

GROUP MUSIC COPYRIGHT LICENSES

Group Licenses are designed to support central or administrative organizations (such as a diocese or a synod, school district, network of summer camps, etc.) with an efficient and affordable means of managing music used in worship and religious education.

All Group Licenses feature:

- Centralized billing and group discounts.
- Access to usage reporting to ensure reporting accountability for copyright law.
- Easy administrative tools for adding new organizations and editing their attendance information.
- The account owner receives one bill, and all sub-organizations process their own song usage reports.
